INTRODUCTION

Education is changing a lot because of technology. One big part of this change is e-tech websites. They use digital tools to make learning fun, easy to access, and personalized for each person. These websites are like leaders in making education better by using technology in a smooth way

PROJECT OBJECTIVES

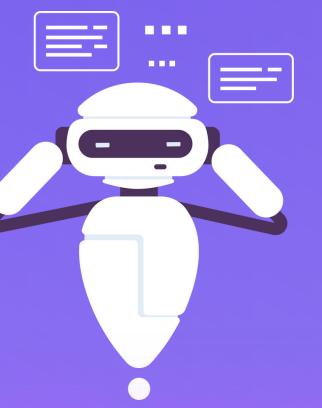

INTERACTIVE LEARNING MODULES

E-tech websites usually have videos, interactive lessons, and fun games to help you learn better and have more fun while doing it.

COLLABORATIVE TOOLS

In online classrooms, chat groups, and team projects, students can work together and share their ideas. It's like working as a team, even if you're not in the same place.

REAL-TIME PROGRESS TRACKING

Robust analytics provide instant feedback, allowing students and educators to monitor performance and adjust strategies accordingly.

TECHNOLOGY USES

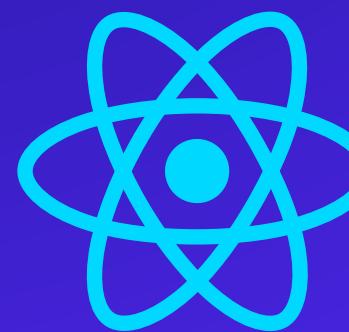

HTML

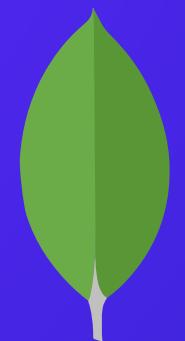

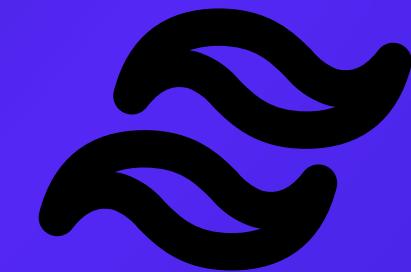

CSS

JavaScript

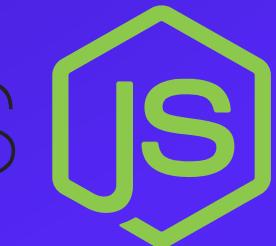

React

mongoDB

Express

node.js

THANK YOU!
